

Aqua Root Granules

High quality zeolite (CEC) with
yucca and probiotics for effective performance

Description

Aqua Root Granules is a unique blend of Mineral Zeolite with selected Ammonia binding agents to ensure optimum absorption, Catalysis & Cation Exchange.

Benefits

- Maximises Ammonia Absorption.
- Improves the soil and water quality.
- Helps to prevent the occurrence of diseases.
- Control the growth of Micro – Organisms in water.
- Prevent and control bacterial pathogens in the Pond.
- Exchanges ammonia & other poisonous gases in water.
- The unique blend purifies water & Improves dissolved oxygen contents.
- The Granule form gives good absorption of toxic gases & makes the habitat clean & healthy for aquatic life.

Composition

1. SiO₂
2. Al₂O₃
3. Fe₂O₃
4. CaO
5. Seaweed extract
6. Humic acid
7. Coconut shell based Activated Carbon
8. Fulvic acid
9. Multienzyme
10. Rhodococcus : 1×10^5
11. Rhodobacter : 1×10^5
12. Nitrosomonas : 1×10^5
13. Nitrobacter : 1×10^5

Dosage

1 – 2 Kg per acre or as recommend by an aqua culture consultant / Expert.

Manufactured & Marketed by
